

12 actions for better motoring

Better for you and for the planet

We all love our cars but did you know that driving contributes more than 80 percent of carbon monoxide emissions in urban Australia. Oil from cars ends up in the waterways too, causing pollution. By making a few small changes to the way you drive and treat your car, you can save fuel, money and emissions 💰, reduce waste ♻️, and improve safety ⚠️.

1

Leave the car at home when possible

💰 I will do this

2

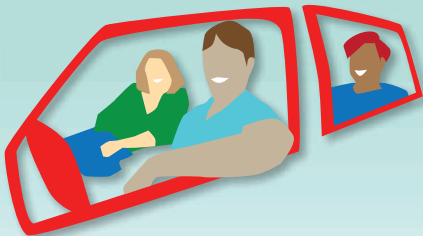

Travel out of peak hours – you'll save time!

💰 I will do this

3

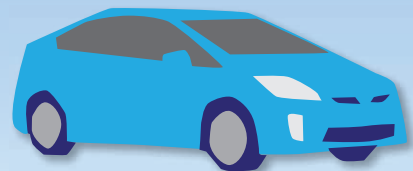

Be more sociable and share a car with your friends!

💰 I will do this

4

Choose a low emissions vehicle like a **Toyota Prius**

💰 I will do this

5

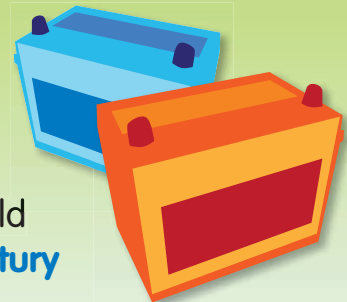

Take unnecessary and heavy items out of the boot

💰 I will do this

6

Recycle your old battery at **Century Yuasa Battery Recycling Centres**

♻️ I will do this

7

Buy low resistance tyres like **Bridgestone Ecopia**

I will do this

8

Have your old tyres **recycled** when replacing them

I will do this

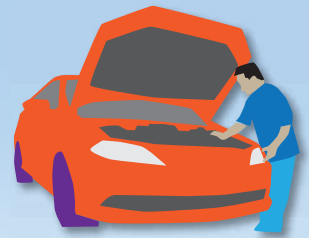

9

Turn off the engine when idling

I will do this

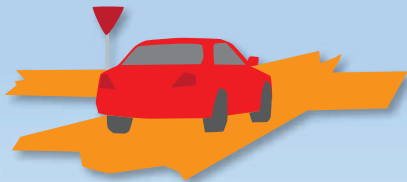

10

Service your car regularly to keep it running efficiently

I will do this

11

Accelerate and brake smoothly and look beyond the car in front to anticipate the flow of traffic

I will do this

12

Use the air-conditioning sparingly by installing **Unite Window Film** to reduce heat or open them on hot days.

I will do this
